

Voice-driven clinical documentation for eClinicalWorks

Seamless integration and single voice profile deliver an enhanced documentation experience.

The patient story should be dictated by clinicians—not technology limitations. Nuance delivers industry-leading speech solutions through the cloud so your staff can stay productive anywhere and document the complete patient story directly in eClinicalWorks using voice—on their terms. And healthcare organizations can save IT resources, boost clinician productivity, and support better reimbursement through higher quality clinical documentation.

Whether your clinicians want to document the patient record in real time, generate voice-driven content outside the patient chart, access their personal voice profile in eClinicalWorks mobile apps, or create dictation files that are automatically routed for transcription and placement in eClinicalWorks, Nuance has you covered. Our industry-leading speech recognition technology delivers 99% accuracy from the start with no voice profile training. A single voice profile, accessible across locations and devices, continues to adapt and get even better over time, for an optimal clinician experience. Our state-of-the-art transcription platform offers superior levels of system safety, privacy protection, and reliability.

Choose the solutions that best fit your user needs, clinical workflows, IT requirements, and business goals. For an unrivaled voice-driven clinical documentation experience in eClinicalWorks, leverage any or all of these Nuance solutions: Dragon Medical embedded in eClinicalTouch and eClinicalMobile, Dragon Medical One, and eScripton One.

Choose the solutions that best fit your users' needs

Dragon Medical embedded in eClinicalTouch and eClinicalMobile

Access an advanced voice-driven workflow in eClinicalWorks mobile applications with no additional software to install or usernames/passwords to remember. Dictate content and use voice commands to insert auto-texts and edit content.

Dragon Medical One

Feature-rich cloud platform lets users dictate at the cursor in eClinicalWorks and other supported apps. The easy-to-deploy solution includes robust online analytics and is compatible with Nuance and partner workflow enhancements.

eScripton One

Modern transcription platform with powerful mobile app supports anytime, anywhere dictation by delivering an end-to-end documentation solution with an integrated patient schedule. Clinicians dictate and route files for transcription and placement in eClinicalWorks.
