Microsoft + NUANCE

Continuous clinical improvement made easier

Build, maintain, and access meaningful teaching files to systematically and securely advance clinical insight and expertise.

An accessible library of meaningful cases can help hone diagnostic and interpretive expertise as part of peer learning and professional development. But having a streamlined, secure process for defining, storing, and using these case collections can be challenging.

With PowerConnect Teaching Files, radiologists can flag, archive, retrieve, and securely share meaningful case examples from within the reporting workflow. Details and images are searchable and readily available, making it easier to incorporate relevant insight and information to enhance teaching and learning.

Integrated within the reporting workflow. Accessed from within PowerConnect Communicator, users can launch Teaching Files with a mouse click. It's easy to flag a case and come back to add details or annotate later. Integration with the PACS makes studies and patient context readily available and easy to incorporate. Presentations can be shared via the in-app Teaching View or exported to PowerPoint or PDF.

Flexible and secure. Robust configuration and search options organize and categorize cases and enable queries by diagnosis, anatomic location, sub-specialty, or other criteria. Public and private teaching file collections are supported, with embedded safeguards to protect PHI and maintain HIPAA compliance.

As healthcare pivots to remote environments, PowerConnect Teaching Files augments in-person education and fosters peer learning within a convenient and secure infrastructure. These capabilities encourage participation and support learning efforts to impact quality, value, and patient care positively.

About Nuance Communications, Inc.
Nuance Communications is a technology pioneer with market leadership in conversational AI and ambient intelligence. A full-service partner trusted by 77 percent of U.S. hospitals and more than 75 percent of the Fortune 100 companies worldwide, Nuance creates intuitive solutions that amplify people's ability to help others. Nuance is a Microsoft company.

KEY BENEFITS

— **Fosters teaching and learning initiatives** with convenient, in-workflow tools.

— **Supports HIPAA compliance efforts** while providing a secure framework for teaching file storage, retrieval, and sharing.

— **Accommodates public and private file collections** for individual, organization-wide or third-party subscription uses.

— **Supports ACGME requirements** for resident access to cases.

KEY FEATURES

— **Robust tagging and annotation capabilities** optimize categorization and facilitate retrieval.

— **Flexible configuration options** accommodate individual and organizational teaching priorities.

— I**ntegration with PACS** provides patient context and image access.

— **Auditing and tracking options** flag used files and record who viewed files.
